acrylic display cabinet multicase with carbon design back for 36 1/43rd scale models

45-43200, € 269,00

This exclusive Raceland wall display cabinet has especially been developed for us to hold 36 1/43rd scale Spark models. As each collector favours a different way of presentation, it was important to us to have all options in view.

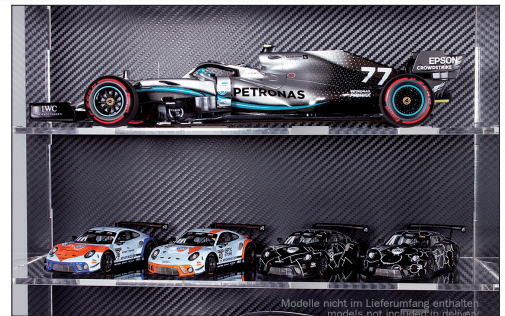

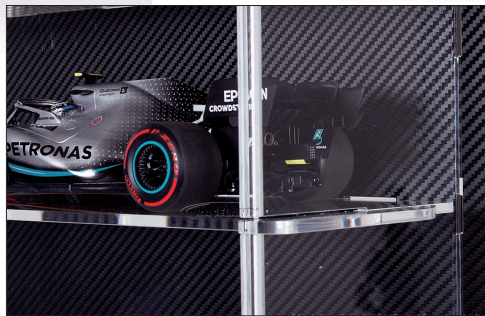

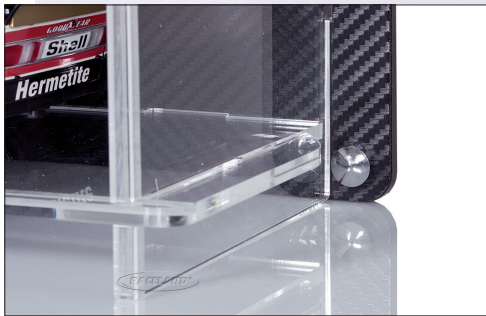

In each of the 36 individual compartments, you can display a Spark model either complete with its original packaging or just with base and plexi cover, with the original base only or, of course, without any base at all.

Modern, premium quality acrylic display case made in Europe with carbon fibre structure design rear panel. For wall mounting incl. mounting material. Ingenious, easy-to-use plug-in system and yet reliably dust-proof thanks to the front that slides in from above and is guided in grooves.

Overall external dimensions: width 95 cm, height 45 cm, body depth 11.5 cm, usable depth 8 cm.

Six levels, each with six individual compartments and a usable shelf space per individual compartment of 14.5 cm wide by 8 cm deep by 6 cm high.
